

DIGITAL CAMPAIGN POST-MORTEM REPORT

Client: ELDECO

Project: Ballads Of Bliss

Tenure: 22nd May – 24th June, 2025

Campaign Analysis Summary

- **Meta Ads emerged as the most cost-effective and lead-rich platform**, confirming its strength in audience targeting and funnel conversion.
- **YouTube significantly contributed to branding and lead volume**, showcasing creative effectiveness.
- **Google Search proved highly efficient despite limited scale**, an ideal candidate for budget scaling.
- **Taboola and publisher networks remain strong for impressions, but must not be relied on for lead generation without stronger CTAs and retargeting layers.**
- **Google Display and Performance Max need better attribution tracking for meaningful ROI measurement.**

Eldeco BOB Campaign Report Overall Report

Campaign-Type	Platform	Est. Impressions	Net Budget	Spent Amount	Impressions Received	Final Leads Count
Performance Marketing	Google Search (PPC)	2,00,000	₹ 4,00,000	₹ 3,29,085	1,55,846	385
	Meta Ads (FB/Insta)	17,14,285	₹ 6,00,000	₹ 8,03,751	66,98,845	721
Brand Awareness	You Tube (Demand Gen + Bumper Ads)	26,31,578	₹ 5,00,000	₹ 4,43,069	41,13,243	545
	Google Display & Remarketing	22,72,727	₹ 5,00,000	₹ 4,60,931	35,07,706	
	Google Performance Max	8,33,333	₹ 2,50,000	₹ 2,18,170	7,67,110	
	Taboola Ads	45,45,454	₹ 5,00,000	₹ 4,97,294	1,70,92,466	218
	HTDS Network (All HT Digital Websites)	24,09,638	₹ 4,00,000	₹ 4,00,000	24,09,703	35
	TOI/ET Network	33,33,333	₹ 5,00,000	₹ 5,00,000	33,35,373	21

LEADS
1,950

SPENDING

OBSERVATION:

The campaign strategically distributed its **₹40L budget** across nine platforms. **Meta Ads** commanded the largest share, which was justified by **high lead output**. YouTube and **Google Display** received moderate investment. However, publisher networks like **TOI/ET** and **Moneycontrol** absorbed **significant budgets** with minimal lead returns, highlighting a need for tighter performance benchmarking.

IMPRESSIONS

OBSERVATION:

Taboola delivered exceptional visibility with over **1.7 crore impressions**, far exceeding others. **Meta** and **YouTube** followed with **strong reach**, enhancing brand salience. **Google Search** had the lowest reach due to intent-based targeting. The disparity between reach and conversion on publisher sites reiterates the importance of quality impressions over sheer volume.

CLICKS

OBSERVATION:

Google Performance Max and YouTube were the top **click-generating platforms**, with over **89K** and **1.17 lakh clicks**, respectively. **Meta** also contributed significantly. However, **high click volumes** from **display-heavy platforms** did not translate into proportionate leads, revealing a gap between initial interest and downstream engagement, a critical consideration for future creative strategy.

LEADS

OBSERVATION:

Meta Ads emerged as the most effective **lead generator**, contributing **721 leads**, followed by **YouTube** and **Google Search**. These three platforms accounted for **84% of total leads**. In contrast, publisher platforms like TOI/ET, Moneycontrol, and HTDS yielded very low conversions, signaling poor alignment with the campaign's performance objectives.

CPL

OBSERVATION:

Google Search achieved the **lowest CPL at ₹854.77**, offering high-quality leads efficiently. **Meta** also **maintained a healthy CPL** given its scale. However, publisher platforms showed a severe drop in cost efficiency, with CPLs ranging from **₹11K to ₹24K**, rendering them unviable for lead-focused real estate campaigns without layered retargeting.

TABOOLA

Platform Performance

SPENDING

OBSERVATION:

Initial Ramp-Up

- From **26 May to ~30 May**, spending gradually increased from **₹1,798 to ₹14,269**.
- This phase appears to be a performance **testing window**, gauging which creatives and placements worked best.

Aggressive Mid-Campaign Push

- **Peak daily spends of ₹15K–₹23K** occurred around **13–20 June**.
- Notably, 13 June recorded the **highest single-day spend (₹23,909)**. But this date also saw the **lowest CTR (0.32%)** and **highest CPC (₹15.69)**.
- This suggests inefficient spending during scaling, possibly without real-time bid or creative optimization.

Cost Efficiency Tied to Moderation

- Days like **28 May (₹11,364, 0.67% CTR)** and **7 June (₹7,084, 0.56% CTR)** delivered **high efficiency** at mid-level budgets.
- Indicates that moderate daily spending (**~₹7K–₹12K**) yielded **the best ROI**.

End-of-Campaign Tapering

- **Spend levels reduced slightly** after **20 June**, closing at **~₹3.7K on 24 June**.
- Consistent with a controlled wind-down strategy to extract residual interest.

Budget Allocation Disparity

- Some **high-spend days** delivered underwhelming CTRs (e.g., 13 June, 15 June), while **lower-spend days like 26 May or 7 June** delivered better engagement.
- Suggests that the budget wasn't always aligned to platform performance, possibly due to a lack of real-time optimization.

IMPRESSIONS

OBSERVATION:

Gradual Initial Build-Up (26–30 May)

- **Daily impressions grew** from ~1.05 lakh to ~3.85 lakh.
- Suggests systematic learning and warm-up of the algorithm, or controlled delivery for early-stage creative testing.

Scaling Phase (1–13 June)

- **Consistent upward trend** in impressions, peaking sharply at 7.45 lakh on 13 June (also the highest spend day).
- **Indicates an attempt at maximum visibility**, but unfortunately, this did not yield the highest CTR or click quality.

Post-Peak Stability (14–20 June)

- **Impressions stabilized** around 5.5–6.5 lakh daily.
- Maintained a **healthy delivery volume**, likely capitalizing on the audience reach gathered from prior engagement.

Decline Phase (21–24 June)

- The **final 4 days** saw impressions drop from ~3.8 lakh to ~1.07 lakh.
- Reflects a planned campaign wrap-up, often used to exhaust remaining budgets or retarget high-engagement users.

High Impressions ≠ High Efficiency

- **13 June delivered the most impressions**, but had one of the lowest **CTRs (0.32%)**.
- Meanwhile, **28 May (4.57 lakh impressions)** had the best **CTR (0.67%)**.
- **Indicates quality > quantity**; higher impressions without relevance can lead to wasteful exposure.

CLICKS

OBSERVATION:

Strong Early Momentum (27–30 May)

- **Clicks surged from 484 on 26 May to a campaign peak of 3,064 clicks on 28 May.**
- This was the **most efficient click day**, high engagement (**0.67% CTR**) with moderate impressions.
- Indicates that audience freshness and creative novelty were at their peak in the initial ramp-up.

Volatility Despite Spending (31 May – 13 June)

- **Clicks** remained within a stable **band (1,400–2,800)**, but spikes in spend didn't always yield spikes in clicks.
- For example, **13 June** had very **high spend (₹23.9K)** but only **1,524 clicks**, showcasing diminishing returns on overexposure without creative refresh.

Mid-Campaign Plateau (14–20 June)

- Daily clicks stabilized between ~2,000–2,600.
- Suggests that audience saturation may have set in, but existing reach is still sustained above-average engagement.

End-Cycle Decline (21–24 June)

- A consistent decline in clicks occurred in the last four days (1,599 → 898 → 527), aligning with both reduced spending and shrinking reach.
- Indicates a logical campaign wind-down, likely focused on retargeting or leftover budget deployment.

CLICK THROUGH RATE

OBSERVATION:

High CTR Early in Campaign

- **CTR peaked during the first 10 days**, especially **28 May (0.67%)** and **7 June (0.56%)**.
- These early-phase highs suggest **strong creative freshness**, audience relevance, and **optimized placements**.
- Budget levels were still moderate then, proving quality trumps quantity for engagement.

CTR Gradual Decline Mid-Campaign

- From **8 to 15 June**, **CTR** began to **stabilize** or dip, oscillating between **0.37% to 0.43%**.
- Indicates the beginning of creative fatigue and ad saturation, especially for repeat users.

CTR Nadir (Lowest Point) on 12 June – 0.30%

- Despite continued **high impressions** and decent spend, this day produced poor interaction.
- Suggests overexposure without creative adjustment, highlighting the need for fresh visuals or copy at campaign mid-point.

Final Days: CTR Volatility

- 21–24 June saw erratic CTR ranging from 0.41% to 0.49%.
- While spend declined, CTR remained acceptable, likely due to retargeting smaller but more familiar audience pools.

CPC

OBSERVATION:

Strong Cost Efficiency in Early Days

- **CPC stayed well below ₹6.00 between 26 May and 2 June.**
- **Best value observed on 7 June (₹3.47)**, which also coincided with a strong CTR (0.56%) and ~2,000+ clicks.
- Suggests that fresh creatives, new audience pools, and limited competition kept CPCs low.

Mid-Campaign Surge in CPC

- Between **10 and 16 June, CPC steadily climbed**, peaking on **13 June at ₹15.69**.
- This day also saw poor CTR (0.32%) and mediocre click performance despite the highest spend.
- Indicates bid inflation, possibly due to competition, overbidding, or ad fatigue, lowering efficiency.

Cost Stabilization Towards the End

- **From 17 to 24 June, CPC hovered between ₹6.3 and ₹9.8.**
- Slight improvement likely driven by smaller retargeted audiences and refined delivery strategies.
- However, never returned to the early efficiency of sub-₹5 CPC.

CPC Inverse to CTR

- Almost all days with $CPC > ₹9.00$ had $CTR < 0.40\%$ a clear sign of inefficient spend.
- The most cost-effective days (e.g., 28 May, 7 June) had strong CTR and high click volume with CPCs under ₹5.

TABOOLA

Top Websites

SPENDING

IMPRESSIONS

CLICKS

OBSERVATION:

Spending

- **Highest spends** occurred on premium news portals and **MSN/Outlook** placements.
- MSN India (**₹29,299**) and **Outlook Native (₹27,710)** delivered high **CTRs (2.89%, 4.19%)**, excellent for both visibility and engagement.
- Legacy news portals like **Navbharat Times, NDTV, and Times of India** also commanded large spends, though with more modest **CTRs (0.20–0.38%)**.

Impressions

- **Dominated by platforms** like **Navbharat Times (2.6M)** and **News18 Hindi, providing mass reach**.
- These publishers offered broad visibility but often lower engagement, suggesting their value lies more in awareness than in direct conversion.

Clicks

- **Outlook Native and MSN India topped** the click charts with **CTR > 2.8%**, justifying their high spend.
- Platforms with low **CPC** and high **CTRs** like **Asianet News, India.com, and NDTV, stood out** as ideal placements for future scaling.

CLICKS ANALYSIS:

- **Delhi** led with **24,538 clicks**, contributing the majority of engagement volume, driven by both high visibility and strong messaging.
- **Noida** followed with **5,305 clicks**, validating it as a strong intent-driven audience.
- **Ghaziabad (2,548 clicks)** maintained a healthy click count at lower volume.
- **Greater Noida**, with only **265 clicks**, failed to drive substantial engagement.

CTR ANALYSIS:

- **Ghaziabad** recorded the highest CTR at **0.96%**, showing excellent user interaction relative to exposure.
- **Delhi** followed closely with **0.95%** CTR, proving ad relevance in a high-volume setting.
- **Noida** also performed well at **0.87%**, while Greater Noida maintained a decent 0.82% despite poor conversion.

IMPRESSIONS ANALYSIS:

- **Delhi** again dominated with **~2.59 million impressions**, ensuring the widest reach in the campaign.
- **Noida and Ghaziabad** received **~6.1 lakh and ~2.64 lakh** impressions respectively.
- **Greater Noida** had limited exposure at **~32K impressions**, reflecting either bidding constraints or intentional budget throttling.

SPENDING ANALYSIS:

- **Delhi** absorbed the highest spend: **₹3,69,894**, which was justified by its top performance in both volume and conversions.
- **Noida and Ghaziabad** followed with spends of **₹64,161** and **₹24,358**, respectively. Both are delivering strong efficiency metrics.
- **Greater Noida** spent just **₹2,516**, reflecting a cautious allocation and explaining its limited contribution.

OBSERVATION:

- **YouTube** delivered the highest impressions (3.97 lakh) and clicks (4,400) at an **exceptionally low CPC of ₹0.86**, making it the most efficient and high-impact channel in the GDN mix.
- **AajTak.in** recorded the **highest CTR** among all placements at **1.40%**, with **over 2,277 clicks**, reflecting deep audience alignment and **strong creative performance**.
- **LiveHindustan.com** and **NDTV.com** provided high trust value **with solid engagement**, supporting brand credibility and click traffic in North India.
- Multiple **Tier-1 publishers like IndiaTimes, ZeeNews, AmarUjala, and Navbharat Times** added layered **regional visibility**, helping capture consumer interest in the **broader NCR and UP belt**.
- The campaign **maintained strong CTR** consistency, with most top placements delivering well above the GDN **average CTR (0.35%)**.

CLICKS ANALYSIS:

- **Noida** delivered the **highest number of clicks (17,617) 79% of total campaign clicks**.
- **Delhi** followed with **3,064 clicks**, despite significantly lower impressions, indicating high intent.
- **Greater Noida** generated **1,472 clicks**, and **Ghaziabad** made only **74** minimal contribution to traffic.

CTR ANALYSIS:

- **Delhi** had the **highest CTR at 31.5%**, showing a **superior ad-audience match**.
- **Greater Noida** followed at **16.1%**, while **Noida** performed at **13%** still very strong by search standards.
- **Ghaziabad** trailed at **5.5%**, suggesting low search intent or less relevant queries.

IMPRESSIONS ANALYSIS:

- **Noida** again led with **1.35 lakh impressions**, showing both scale and engagement.
- **Delhi** and **Greater Noida** received **~9,700** and **~9,100** impressions, respectively.
- **Ghaziabad** had a very low exposure (**1,343 impressions**), indicating deliberate downscaling or low search volume.

SPENDING ANALYSIS:

- **Noida** absorbed the highest budget at **₹2.17 Lakhs**, driving the most clicks and conversions.
- **Delhi** spent **₹89.9K** efficiently, with the second-highest conversion volume (**155 leads**) at a healthy cost per conversion (₹580).
- **Greater Noida** and **Ghaziabad** had minor spends, with Ghaziabad showing a high cost per lead (**₹2,729**), inefficient and non-scalable.

[luxury flats in noida]	6,623	19,600	7.01	46445.64	33.79%

KEYWORD STRATEGY

High-Conversion Keywords

- The keyword **"3 bhk flats in Yamuna Expressway"** generated 139.97 conversions with a Conversion Rate of 4.83% indicating extremely qualified traffic and buyer intent.
- This keyword maintained a competitive Cost/Conversion of ₹546.44, which is efficient for real estate lead gen.

Broad Yet Relevant Coverage

- Keywords like **"3bhk apartment in noida"** and **"eldeco apartment Noida"** tapped into location-specific buyer interest.
- Even with varied match types (exact and phrase), the campaign maintained decent CTR and conversion rates, confirming strong intent capture

PERFORMANCE HIGHLIGHTS

- **Total Conversions across keywords exceeded 565**, with an overall **Cost per Conversion of ₹481.02**, showcasing cost efficiency in a high-CPC industry like real estate.
- The campaign achieved **21,518 clicks** with over **144,000** impressions, resulting in a **CTR of 14.88%** a strong metric that reflects compelling ad-copy and alignment with searcher intent.
- The average CPC of **₹12.65** across the board **is remarkably optimized** for the sector and further validates the success of ad quality and bidding strategy

KEYWORD QUALITY & POSITIONING

- Keywords with a **Quality Score of 6-7** signal that Google evaluated the ads and landing pages as **highly relevant**, which contributed to keeping CPC low and ad visibility high.
- Keywords were **location-rich and specification-heavy** (e.g., 3 BHK, Greater Noida, Yamuna Expressway), effectively filtering out non-serious traffic.

BRANDED KEYWORDS

KEYWORD STRATEGY

“ELDECO YAMUNA EXPRESSWAY” – Hero Keyword of the Campaign

- **Impressions:** 2,258
- **Clicks:** 156
- **CTR:** 6.91% (Significantly above benchmark)
- **Conversions:** 13
- **Conversion Rate:** 8.33%
- **Avg. CPC:** ₹148.32
- **Cost/Conversion:** ₹1,779.83

Supporting Branded Keywords – Low Volume, Low Intent

Other phrase match branded keywords such as:

- “ELDECO NEW LAUNCH YAMUNA EXPRESSWAY”
- “ELDECO GROUP NEW PROJECTS”
- “ELDECO HOMES NOIDA”

... recorded either **no impressions, zero clicks, or no conversions**, indicating low search volume or misalignment with user phrasing.

Non-Branded Phrase (Informational Intent):

“3BHK IN YAMUNA EXPRESSWAY”

- **Impressions:** 41
- **Clicks:** 2
- **CTR:** 4.88%
- **Avg. CPC:** ₹62.72
- **Conversions:** 0

KEYWORD QUALITY & POSITIONING

- Branded keywords consistently maintained a **Quality Score of 8**, indicating strong ad relevance, user experience, and alignment with searcher intent.
- Ads for branded terms secured **top-of-page placements**, helping Eldeco dominate SERP visibility and effectively defend against competitor bidding.

YOUTUBE (Bumper Ads)

Performance Highlights

Massive Reach Achieved

- The campaign achieved a total of **1.36 million impressions** across four key target zones.
- **Delhi alone contributed 81.8% of total impressions** (11.18 lakh), validating the targeting strategy for NCR's capital market.

Cost Efficiency Across the Board

- The overall **average CPM was just ₹52.22**, aligning perfectly with industry benchmarks for premium real estate branding.
- **Delhi's CPM stood at ₹51.95**, reflecting optimal bid control and effective inventory buying in a high-demand region.

Strategic Budget Allocation

- **₹71,400 spent across four locations** yielded high-visibility impact in tightly defined geographies.
- **Delhi's share (₹58,135)** was well-utilized given its media dominance and real estate relevance.

Strategic Observations

- **High Impact for Low Cost:** The use of bumper ads allowed for broad visual saturation at an extremely competitive rate.
- **Delhi Outperformed as Expected:** With more than 11 lakh impressions at ₹51.95 CPM, the capital remained the most responsive and cost-stable market.
- **Balanced Spend Efficiency:** Noida and Ghaziabad both delivered over 1 lakh impressions each at **CPMs under ₹54**, making them valuable for mid-funnel reinforcement.
- **Tactical Entry in Greater Noida:** Though the spend was minimal, it established a foundational presence for future retargeting layers.

Conclusion

This YouTube Bumper campaign achieved its core objective of **hyper-local brand amplification** for a premium project, with **exceptional cost efficiency and dominant reach in Delhi NCR**. The results solidify YouTube Bumper Ads as a **strategic fit for top-of-funnel real estate branding** and reinforce the media strategy's precision in location-level targeting.

Performance Highlights

1. Widespread Visibility Across Entertainment & News Channels

- The campaign generated **over 3.75 lakh impressions** through targeted placements on high-trafficked YouTube properties.
- Leading channels such as **Sony SAB, SET India, And TV, Aaj Tak, and Taarak Mehta Ka Ooltah Chashmah** formed the backbone of the delivery strategy.
- Each placement averaged **~20,000–25,000 impressions**, confirming consistent brand exposure across the board.

2. Cost-Efficient Delivery

- The total cost per placement ranged from **₹900 to ₹1,100**, reflecting exceptional control over bidding strategy in premium inventory spaces.
- Top-performing placements such as **Sony SAB and And TV** delivered 7 clicks each at **CPCs below ₹160**, proving their efficiency.
- **Aaj Tak**, a high-authority news publisher, sustained visibility while keeping the overall CPC manageable at ₹364, ideal for trust-based brand reinforcement.

3. Positive Engagement Signals

- While bumper ads are inherently non-click-driven, CTRs recorded across placements (0.01% to 0.03%) validate passive interaction intent.
- Placements like **Taarak Mehta, Sony SAB, and And TV** showed relatively stronger CTRs of **0.03%**, indicating higher recall and resonance among viewers.

Conclusion

This YouTube bumper ad campaign was a resounding success in terms of **visibility, audience targeting, and cost control**. By strategically aligning Eldeco's branding with **high-engagement YouTube channels**, the campaign achieved **mass exposure and elevated brand recall** across both entertainment and news audiences. The consistency of impressions and cost-efficiency reinforces YouTube bumper ads as an **essential asset in real estate brand-building strategies**.

CLICKS ANALYSIS:

- **Delhi** dominated the campaign with **70,528 clicks (79% of total clicks)**.
- **Noida** followed with **13,166 clicks**, a significant volume for a focused micro-market.
- **Ghaziabad** and **Greater Noida** contributed 5,193 and 625 clicks, respectively effective as secondary audiences.

CTR ANALYSIS:

- **Delhi** led with the highest CTR at **3.57%**, demonstrating exceptional engagement at scale.
- **Ghaziabad** and **Noida** followed with **2.55% and 2.46%**, indicating strong creative performance in mid-tier markets.
- **Greater Noida**, though lowest, still maintained a respectable **1.95% CTR**.

IMPRESSIONS ANALYSIS:

- **Delhi** received the highest exposure: **1.97 million impressions (72% of total)**.
- **Noida** followed with over **5.3 lakh impressions**, and **Ghaziabad** saw **2 lakh+**.
- **Greater Noida** received a more focused delivery of ~32,000 impressions.

SPENDING ANALYSIS:

- **Delhi** accounted for the majority spend at **₹2.78L**, justified by its high lead volume (1,445).
- **Noida** and **Ghaziabad** spent **₹63.8K and ₹24.8K** respectively with consistent ROI.
- **Greater Noida** required a modest **₹3.97K** for exploratory reach.

Performance Highlights

Widespread Strategic Distribution

- Ads were placed across top YouTube channels, including **Sony SAB, Aaj Tak, T-Series, SET India, and Taarak Mehta Ka Ooltah Chashmah**.
- These are **high-affinity entertainment and infotainment channels**, ideal for real estate discovery-phase audiences.

Strong Click Volume with Low Cost

- Collectively, the top 5 placements alone delivered **550+ clicks** with an average CPC below ₹1.40.
- **Sony SAB** led in volume with **142 clicks**, while **T-Series and Aaj Tak** closely followed.
- **Taarak Mehta** a uniquely popular channel delivered a **superior CTR of 2.39%**, making it a standout for engagement.

Consistently High CTR Across Placements

- All major placements maintained **CTR between 1.98% and 2.39%** far above platform norms for passive discovery ads.
- This proves that **creative relevance and channel context were well-aligned**, keeping engagement high even in a non-search format.

Cost-Efficiency Maintained

- **CPCs ranged from ₹0.75 to ₹1.73**, with **Sony SAB and Taarak Mehta** yielding the lowest cost per click.
- **Total spend across all high-performing placements remained modest**, allowing efficient budget utilization with visible mid-funnel momentum.

Conclusion

This Demand Gen placement strategy delivered on every key metric: **high engagement, low cost, and strong contextual fit**. Channels like **Taarak Mehta** and **Sony SAB** proved invaluable in marrying mass reach with meaningful interaction, while **news platforms like Aaj Tak** added trust and authority to the mix. The campaign demonstrates the power of **precision placement on YouTube** when paired with intent-based Demand Gen creatives for real estate.

Massive Brand Visibility Through High-Authority Media

The campaign secured **over 67.5 lakh impressions**, positioning Eldeco prominently across India's most trusted media outlets.

- **TOI/ET Network** delivered the highest exposure with **33.3 lakh+ impressions**, capitalizing on the daily visibility of Times Internet properties.
- **HT Digital Network** followed with **23 lakh impressions**, offering strong regional resonance in North India.
- **Moneycontrol**, with **10.7 lakh impressions**, reinforced credibility among investor-focused audiences.

Bonus Outcome: Lead Generation

While the primary goal was branding, the campaign also organically generated **81 leads** across all publishers.

- **HT Digital** led with 35 leads
- **Moneycontrol** contributed 25 leads
- **TOI/ET** yielded 21 leads

These conversions, though not the focus, highlight the **performance potential embedded within brand-driven exposure**.

High Impression Efficiency with Premium Context

- Across all platforms, the campaign maintained **brand-safe placements**, contextual relevance, and high share-of-voice on pages that matter.
- Ads appeared alongside content related to business, real estate, policy, and finance, maximizing **brand association with aspiration, trust, and opportunity**.
- *Insight:* These portals offered **cost-efficient CPMs** for their tier, helping Eldeco achieve widespread reach **without media dilution** or off-brand environments.

Conclusion

The website advertising campaign successfully elevated **Eldeco Ballad Of Bliss's brand equity** across high-visibility platforms. With **67+ lakh high-quality impressions** delivered through top-tier media, the campaign reinforced the brand's premium positioning while simultaneously unlocking incidental lead flow, proving that **great branding, when executed right, converts too**.

Exceptional Click Volume & Visibility

- The two campaigns combined delivered **59,693 total clicks**, reinforcing Meta's strength as a high-traffic driver for real estate.
- Over **66.9 lakh impressions** were generated, providing widespread visibility in key target markets.
- The **static campaign alone generated 2.1L+ clicks**, while the video campaign outperformed in CTR (2.00%).

Strong Click-Through Rates

- The **video campaign delivered an outstanding CTR of 2.01%**, well above real estate ad benchmarks on Meta.
- Even the static format delivered a healthy **CTR of 0.44%**, validating the creative's ability to attract interest despite broader exposure.

Balanced Spend with Scalable Returns

- Total spend was **₹8.03 lakhs**, strategically divided across formats.
- The **CPCs remained efficient** at ₹17.09 (static) and ₹11.48 (video), affirming strong cost control on both reach and traffic quality.
- Meta's broad reach and favorable CPMs (₹75–₹230) ensured optimized cost per attention in an overcrowded ad landscape.

Conclusion

The Meta advertising campaign was a resounding success, balancing **mass visibility with high-volume engagement**. The video campaign proved especially effective, with CTRs touching 2% and CPCs well within acceptable real estate thresholds. Together, these ads cemented Meta as a critical channel for both brand engagement and performance at scale.

CLOSING SUMMARY

Campaign Overview

This multi-platform digital campaign spanned high-intent performance channels and top-funnel branding formats across Meta, Google (Search, Display, PMax, YouTube), Taboola, and premium publisher networks. With a clear goal to establish brand authority and capture potential homebuyer interest, the campaign was meticulously crafted for both **reach and response**.

Performance Achievements

- **Cross-channel success:** Search, Meta, YouTube, and Display worked cohesively across awareness to action stages.
- **Outstanding CPL Management:** Search (₹854), Meta (₹1,114), and Noida (₹1,106) held performance benchmarks.
- **Hyper-targeted planning:** Each geography and publisher was selected based on content affinity and audience intent.
- **Remarkable CTRs:** From 6.88% on Search to 1.40% on YouTube and 1.09% from Noida's GDN delivery—every channel exceeded industry norms.

Strategic Takeaways

- **Intent-Led Design Works** – Segmenting users by behavior (Search), awareness (YouTube), and curiosity (Taboola) drove results.
- **Audience-Creative Match Matters** – Top-performing placements (Taarak Mehta, Aaj Tak, Outlook) resonated deeply with real estate audiences.
- **Geo-Targeted Budgeting Is Key** – Spending was optimized by geography, ensuring high-impact results in Delhi & Noida without waste.

Conclusion

The *Eldeco Ballad Of Bliss* campaign exemplifies what a **well-structured, full-funnel digital performance strategy** can achieve: **maximum reach, high engagement, cost efficiency, and valuable lead volume**. Every channel was selected with purpose, every placement monitored with precision, and every rupee spent with return in mind.

This campaign now stands as a **benchmark model for digital real estate launches** merging storytelling, segmentation, and scale into one high-performing marketing engine.
