LEGEND

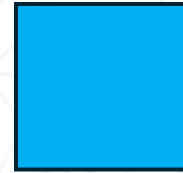

IMPRESSIONS

The number of times an advertisement is displayed or viewed by potential customers, regardless of any interaction with the ad.

CPC (Cost Per Click)

The price paid by an advertiser for each click on their advertisement, indicating the cost of driving traffic to a website.

CTR (Click Through Rate)

A ratio showing how often people who see an ad end up clicking on it, calculated as clicks divided by impressions and expressed as a percentage.

CLICKS

The count of actual instances where users have clicked on an advertisement to visit a website or landing page.

LEADS

Potential customers who have shown interest in a product or service, often by providing contact information through a form or sign-up process on a website.

SPENDING

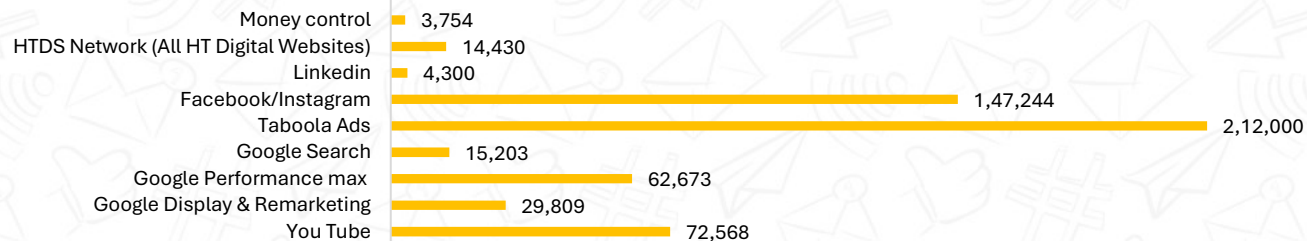

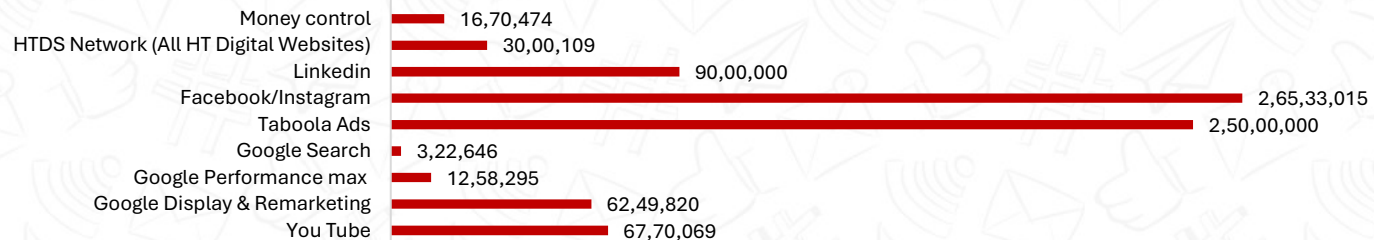

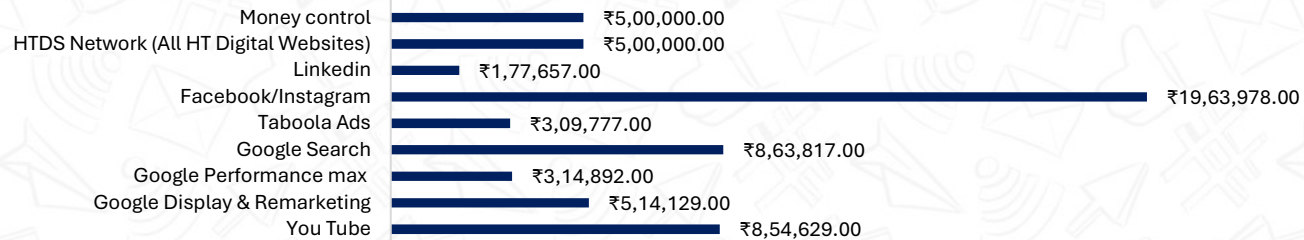

The total amount of money allocated and used for an advertising campaign.

- Facebook, Google Ads, and Taboola have been the highest contributors in the total number of impressions.
- Taboola has maintained the highest efficiency in generating impressions i.e. a CPM of ₹12.39.
- The impressions displayed a high positive deviation from estimation i.e. X2 of the original estimation, indicating a higher subject relevance in with the target audience.

- Taboola had the highest number of clicks on its advertising network website.
- Meta and Google advertising had the second and third-highest number of clicks with a combined count of nearly 3.3 Lakh clicks.
- This indicates Taboola's ability to insert ads in relevant spaces; with a cumulative CPC of ₹1.46

- **Taboola Ads (~CPL: ₹ 2,024)** in this case has not converted its Impressions and Clicks into leads. This indicates that Taboola is a more effective branding tool for a high-relevance audience.
- **Google Ads (~CPL: ₹ 1,515)** have been effective as a cumulative group as intent-based advertising and remarketing have given us a higher impression frequency on a relevant audience.
- **META Ads (~CPL: ₹ 1,126)** with its high user count and behavior-targeting tools has been able to deliver is the highest amount of leads.

- **Google Ads** covers a range of targeted advertising options along with search advertising, which shows high intent on the customer's part.
- **Meta Ads** have received the second highest amount for ad spending due to their range of targeting and campaign flexibility.
- **TABOOLA Ads** have received the lowest amount for advertising but have still managed to provide high ROI for impressions and clicks.

KEY CONSOLIDATED FINDINGS

- Advertising efficacy maintains its maximum positive deviation between Wednesday and Friday.
- Taboola has attained the highest efficiency of relevant impressions and clicks for every rupee spent; making it an ideal platform for branding campaigns.
- **Faridabad** has emerged as an outlier with many leads for projects in Gurugram.
- Google search advertising efficiency has suffered due to high intra-project competition between different parties.
- Competitive branded keywords such as 'DLF based' projects may be avoided in the future as the cost delta between the ticket sizes is very high(3X-5X median CPC).
