

RudraDhara Mobile App Suite :

Project Scope: Cross-platform E-commerce App with AI Personalization.

1: Development Phase Quotation (One-Time Cost)

This table covers the design, coding, testing, and deployment.

App Component	Indian Market Price (Min - Max)	Mauritius Market Price (Min - Max)
Core E-commerce Engine (Cart, Payments, Inventory)	₹4,50,000 – ₹7,50,000	Rs3,50,000 – Rs5,50,000
UI/UX Design (Custom Spiritual Theme)	₹1,20,000 – ₹2,50,000	Rs80,000 – Rs1,50,000
AI Recommender Module (ML + Vector Search)	₹3,00,000 – ₹5,50,000	Rs2,50,000 – Rs4,00,000
Admin Dashboard (Management & Analytics)	₹1,50,000 – ₹2,50,000	Rs1,00,000 – Rs1,80,000
Total Estimated Project Value	₹10,20,000 – ₹18,00,000	Rs7,80,000 – Rs12,80,000

1: App Features & Value Proposition

Feature Type	Technical Implementation	Business Benefit for Client
Smart Onboarding	Social Login (Apple/Google)	Reduces cart abandonment by 30%.
Spiritual Discovery	Advanced Rashi/Mukhi Filters	Helps customers find the "Right" bead instantly.
AI Recommender	MERN + Vector Embedding	Acts as a 24/7 "Digital Priest" for recommendations.
Local Payments	MCB Juice + Stripe Integration	High trust for local Mauritian customers.
Scalable Cloud	AWS + Node.js Architecture	App remains fast during peak festivals (Shivaratri).

3: Post-Launch & Maintenance (Annual)

App maintenance is standardly 15-20% of the total development cost.

Service	India Pricing	Mauritius Pricing

Annual Maintenance (Bug fixes/OS updates)	₹1,50,000 – ₹2,50,000	Rs1,20,000 – Rs2,00,000
Cloud Hosting & DB (Server Rent)	₹1,20,000 – ₹1,80,000	Rs65,000 – Rs1,00,000
Total Annual Retainer	₹2,70,000 – ₹4,30,000	Rs1,85,000 – Rs3,00,000

- **Price Positioning:** We are positioning the app as a "Premium Growth Tool" rather than just a website clone. The inclusion of the AI Recommender justifies the higher-end (Max) pricing.

Why Professional Apps Require This Investment :

"The price of an app is not just for coding; it is for the security, scalability, and sales-driving features that a simple website cannot provide."

1. Global & Indian Market Price Benchmarks (2025-26)

According to major industry reports (Radixweb, Excellent Webworld), here is where the RudraDhara app stands compared to the rest of the market:

App Complexity	Features Included	Market Price (INR)	Market Price (MUR)
Basic MVP	Simple product list, no AI, generic template.	₹3,00,000 – ₹6,00,000	Rs1,60,000 – Rs3,30,000

Standard E-Com	Payments, Push notifications, Tracking.	₹7,00,000 – ₹15,00,000	Rs3,80,000 – Rs8,20,000
Advanced (RudraDhara)	AI Recommender, Custom MERN Logic, MCB Juice Integration, 4K Media.	₹15,00,000 – ₹35,00,000+	Rs8,20,000 – Rs19,00,000+

Conclusion: Our quote of **\$20,000 (~₹16.5 Lakhs)** is at the **entry-level** for a **"Complex/Advanced" app**. In the US or Europe, this same app would cost over **\$80,000 (Rs3.6 Million)**.

2. The "AI Premium" Justification

Most clients don't realize that adding AI isn't just a "button."

- **Market Reference:** According to *Agentive AI/Q*, building a custom AI recommendation engine alone typically starts at \$10,000 - \$50,000 as a standalone project.
- **Why it costs more:** We are using MongoDB Atlas Vector Search. This allows the app to think like a "Digital Priest," matching a user's specific life problems to the exact Rudraksha bead. This is a high-level engineering task that most basic developers cannot do.
